STUDENTS' EDGE

Celebrating Community, Sustainability and Future Milestones

The March 2026 edition of Students' Edge highlights our students' meaningful engagement with the People's Association during recent **Ramadan** Buka Puasa initiatives. We further celebrate achieving the **WWF-Singapore Eco-Schools Bronze Award** for student-led sustainability efforts.

We invite our **Parents community** to join us for an inspiring season of celebration, beginning with the milestone Kindergarten Graduation this month followed by the high-energy "Parents' Power Kick" soccer match and much awaited event of the year - **Annual Day festivities on April 24-25 2026**

At DPS International School, we believe that education extends far beyond textbooks. This Ramadan, our students have truly embodied the spirit of service, empathy, and inclusivity by participating in the **Buka Puasa (breaking of fast) community projects across Singapore**.

In collaboration with the **People's Association (PA)**, our volunteers joined hands with fellow Singaporeans to strengthen community bonds and celebrate the rich diversity that defines our nation. Through such initiatives, our students learn beyond the classroom - developing empathy, civic responsibility, and a deeper appreciation of community values. We are proud to see them contributing meaningfully and representing the school with compassion and enthusiasm.

Eco Schools Award by WWF Singapore

We are thrilled to share that we've officially earned the prestigious **Eco-Schools Bronze Award** from WWF-Singapore for our **"Change the Way You Think About Waste"** project, focusing on plastic waste reduction.

From April to September 2025, our dedicated Eco Club of 25 students took part in the **"Change the Way You Think About Waste"** project, focusing specifically on plastic waste reduction. This journey involved school-wide sustainability assemblies and student-led presentations on the circular economy and waste management. Some of our most successful initiatives included a student-led Ocean Sustainability Escape Room, "Econopoly" board games, and **"Messages on a Bottle"** art displays.

Beyond awareness, our students took part in hands-on projects such as food-waste audits, composting, and monitoring water-efficient crops at our WWF-supported hydroponics station.

Congratulations to our 25 Eco Club Stars for their incredible efforts.
